[PROFESSIONAL EXPERIENCE]

I have been working as a 2D animation compositor, and 3D artist, for the last three years. This involved several jobs, including those with stereoscopic requirements, 2D \ live action integration, and working between 2D and 3D software packages where necessary. I provided technical direction for hardware and software infrastructure, served as compositing lead on projects, and assisted with pipeline efficiency strategies. I have past history in motion graphic design and animation, as well as 3D modeling, effects, animation and lighting.

[CORE SKILLS]

Primary Software Skills: After Effects, AE Stereo Scripts, Trapcode Plugins, Premiere, Photoshop, Illustrator, 3D Studio Max, Vray Renderer, & AutoCAD
Secondary Software Skills: Maya, Nuke, FumeFX, RealFlow, Mocha & 3D Camera Tracking
